

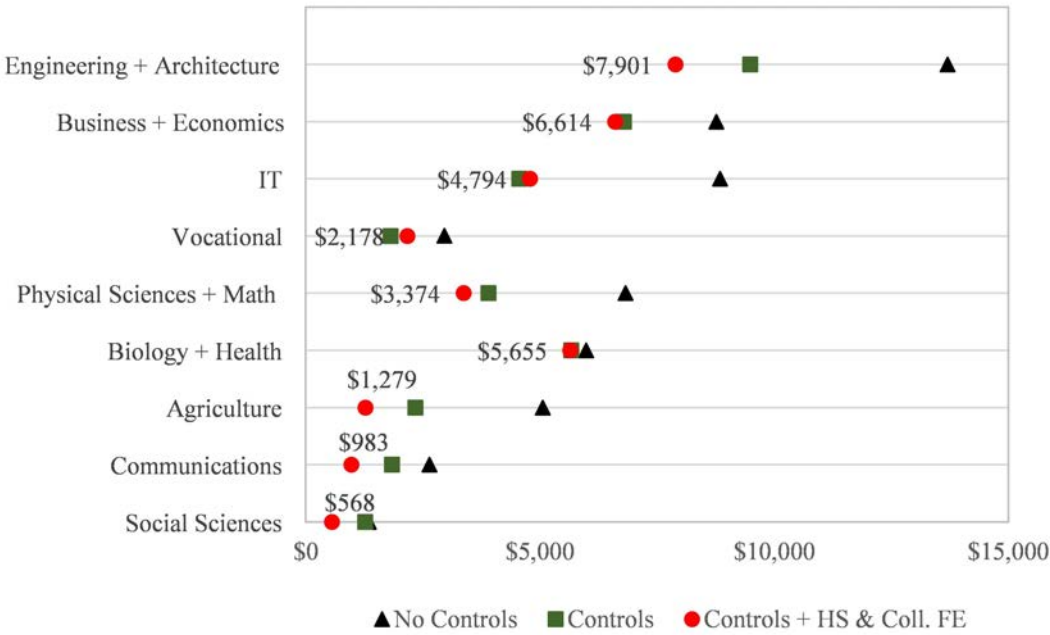

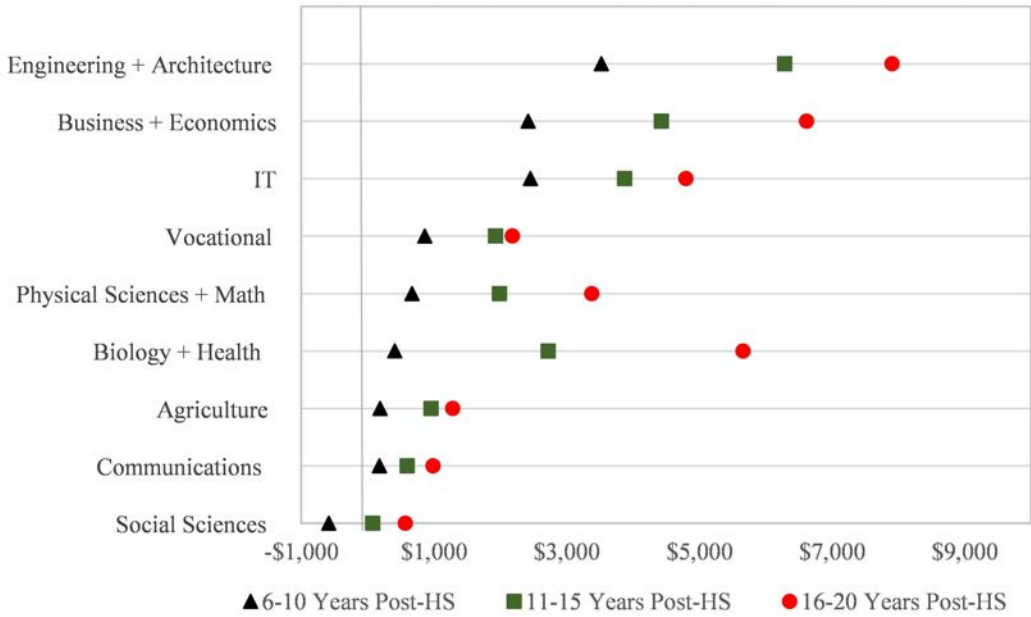

Figure 1: Mean Returns and Earnings Growth Effects of College Major - 4-year Students

(a) Mean Returns 16-20 Years Post-HS

(b) Return to College Major by Potential Experience

Notes: All estimates are relative to liberal arts majors. “Controls” include measures of high school test scores, and student demographic characteristics. All estimates in panel (b) include controls, HS-by-cohort, and post-secondary institution-by-cohort fixed effects. Outcomes are in dollars of quarterly earnings (\$2016).
