

Table A6: Elite peer effect on GPA rank within the high school cohort

	(1) Full sample	(2) Low SES	(3) High SES
A - Overall GPA			
	-8.270*** (0.433)	-10.215*** (0.543)	-5.744*** (0.463)
<i>Number of observations</i>	177,219	58,610	20,018
B - Components of GPA			
Externally assessed written exam grades	-6.140*** (0.349)	-7.152*** (0.434)	-4.670*** (0.475)
<i>Number of observations</i>	177,219	58,610	20,018
Teacher-assessed internal grades	-8.272*** (0.437)	-10.141*** (0.542)	-5.757*** (0.474)
<i>Number of observations</i>	177,219	58,610	20,018
Semi-externally assessed oral exam grades	-4.233*** (0.347)	-5.941*** (0.460)	-2.666*** (0.530)
<i>Number of observations</i>	149,488	49,414	17,189

Notes: OLS estimates of the effect of the proportion of parents with an elite degree in the student's school's cohort in the benchmark model controlling for average peer ability where the dependent variable is now a measure of academic performance. See notes to [Table 2](#) for detailed list of controls. The measures of academic performance are the student's rank within their high school cohort on the overall high school GPA (row 1), average performance on externally assessed written exams across all three years of high school (row 2), average performance on teacher assessed grades across all three years of high school (row 3), and average performance on oral exams marked by an external examiner and the student's teachers across all three years of high school (row 4). All measures of performance are standardized to have mean 0 and standard deviation 1. Column (1) reports the coefficient on the proportion of parents with an elite degree estimated in the full sample, column (2) and column (3) report the same coefficient estimated in the low SES and high SES samples, respectively. Standard errors clustered at the school level. *** $p < 0.01$, ** $p < 0.05$, * $p < 0.1$
