

FIGURE 4. ATTENDS PRIVATE INSTITUTION, INCOME THRESHOLD

Notes: This figure plots the proportion of students around the income threshold who attended a private institution at any point between one and four years since their Cal Grant application, pooled over cohorts. Students are binned by \$1,000 relative to the year-specific eligibility threshold. College attendance is based off of Form 1098-T, and institution types are derived using IPEDs data. Income is reversed so that values above the cutoff represent lower family incomes; crossing the threshold from left to right indicates becoming eligible for the Cal Grant.

TABLE 3—LONGER RUN INCOME AND DEMOGRAPHIC OUTCOMES, 10–14 YEARS AFTER APPLICATION

	GPA threshold			Income threshold		
	Observations	Control mean	Reduced form	Observations	Control mean	Reduced form
Filed a tax return	157,500	0.93	0.004 (0.005)	90,485	0.96	−0.006 (0.005)
log labor income	138,932	11.07	0.054 (0.019)	81,651	10.49	−0.020 (0.024)
Income percentile	157,442	41.89	1.334 (0.491)	90,375	50.83	−0.483 (0.672)
log household size-adjusted AGI	144,369	10.50	0.032 (0.016)	84,999	10.77	−0.005 (0.022)
Lives in California	146,027	0.90	−0.004 (0.007)	85,991	0.86	0.024 (0.011)
Married	146,424	0.53	−0.014 (0.010)	86,162	0.57	0.005 (0.013)
Has kids	146,027	0.48	−0.023 (0.010)	85,991	0.41	0.003 (0.012)

Notes: This table presents estimates of the effect of Cal Grant eligibility on long-run outcomes based on administrative tax data. Regressions at the GPA threshold include income-eligible applicants within 0.3 points of the GPA threshold, and regressions at the income threshold include GPA-eligible applicants within \$10,000 of the income threshold. All regressions include student age, parental education, parental marital status, citizen status, and year-by-family size fixed effects. A linear function of the running variable and a uniform kernel are used. Standard errors are clustered by GPA for GPA threshold regressions and are heteroscedasticity-robust in income threshold regressions. Reduced form control value means are average values for students within 0.05 points below the GPA threshold or within \$1,000 above the income threshold.
